Course analysis BINP29 Sequence Informatics II, spring 2020

Summary of the course evaluation

Number of answers: 11 Overall the students were semicontent with the course (grade 3.1). The students appreciated the combination of lectures and exercises and literature, but suggested improvement regarding communication and support from teachers during exercises, and a revision of the evaluation form where performance during exercises is graded.

Comments from the teachers team

The course went well and the with additional instructor resources all students got the support they needed to complete all assignments and the independent work during project week.

Evaluation of changes made since the previous course

After the previous course we changed many of the teachers and also some of the topics were updated to reflect the current state of the field. This and the variety of topics was appreciated by the students.

Suggested changes for the next course

The next time the course is given we plan to change the time allotted to various parts of the exercises, such as web programming part.

Other teachers
