Course analysis BIOR59+BIOR60 Genetic analysis I and II, spring 2019

Summary of the course evaluation

Number of answers: 18. Overall the students were pleased with the course (grade 4.3). One student scored 1 on a number of questions, however, no comments accompanied these and I did not get any indication during the course that someone was very discontent so I do not know how to interpret this result.

The students especially appreciated lectures and “räkneövningar”. Still some improvement on coordinating can be done.

Comments from the teachers team

The teachers on the course considered that the course went well, better than BioR60 of last year which appeared a bit disparate to some students.

Evaluation of changes made since the previous course

Some changes in R60 with respect to course content.

Suggested changes for the next course

No direct plans. The course will only run three more times.

Other teachers

Bengt Olle Bengtsson, Bengt Hansson.
