Course analysis BIOR63 Molecular Microbiology, spring 2019

Summary of the course evaluation

Number of answers: 11. Overall the students were very pleased with the course (grade 4.2). The students especially appreciated the project and the laboratory practicals, but some felt that the work load was too high.

Comments from the teachers team

The teachers on the course considered that the course was successful which is also reflected in that all students after the resit examination had passed the course.

Evaluation of changes made since the previous course

Lectures were updated otherwise few changes were made since the previous course.

Suggested changes for the next course

The next time the course is given we plan to have a new laboratory practical that illustrates how genome editing can be made with CRISPR-Cas9.
