OF SCIENCE

COURSE ANALYSIS

*Date* 2021-03-29

Main Teacher: Torbjörn Säll

Number of students: 30/15

Number of answers: 16

Grades:

Department of Biology  
Education- Bachelor's and Master's  
level

## **Course Analysis: BIOR59/60 Genetic analysis I and II, spring 2020**

### **Summary of the course evaluation**

The evaluation was generally positive with grades around 4 in both in the overall grade and in the sub-questions.

### **Comments from the teachers team**

The teachers are generally satisfied with the results.

### **Evaluation and changes made since the previous course**

Adjustments of the unit, “genes in populations” in BioR60. Also with some new problems to solve. A step in the right direction but we need to further work with that aspect.

### **Suggested changes for the next course**

We need to further work with the composition of unit 3 in BioR60. See above. In particular we need to work on the problem set.

### **Other teachers involved in the course**

Bengt Olle Bengtsson and Bengt Hansson.
