

Off Campus Access

To get access to licensed e- resources off campus you should use an IP-checked link i.e. this one to **Google Scholar**:

<http://ludwig.lub.lu.se/login?url=http://scholar.google.com/ncr> (english)

<http://ludwig.lub.lu.se/login?url=http://scholar.google.se/> (swedish)

you can also use the IP-checked links from Biology Library's homepage:

- **Web of Science** <http://ludwig.lub.lu.se/login?url=http://webofknowledge.com/>
- **Scopus** ludwig.lub.lu.se/login?url=http://www.scopus.com
- **Google Scholar** ludwig.lub.lu.se/login?url=http://scholar.google.com/ncr

When you use any of these IP-checked links off-campus you will be directed to the CAS-login and you should then use your LUCAT login or [Student account](#).

The IP-check link, [ludwig.lub.lu.se/login?url=](#) directly in front of another e-resource link results in a CAS login where you use your LUCAT login or Student account.

If you have problems with accessing other e-resources i.e. **ScienceDirect** you can add the IP-check to the resource link, [ludwig.lub.lu.se/login?url=http://www.sciencedirect.com/](#)

Another option is to use **VPN** (Virtual Personal Network)

1. Find info at LDC:s support pages <http://www ldc lu se>
2. Search for VPN or Forticlient to get the right installation guide.
3. Download the FortClient to your computer or the app from appropriate "app store".

LU information about access to e-resources from home

More information about [LUCAT](#) login or [Student account](#) at the Lund University Libraries site at: [Accessing e-resources from home.](#)
